## Violent Storm Dumps Heavy Rain in County

A violent thunderstorm slashed through north and central Lancaster County Monday evening leaving in its wake flattened corn and wheat, washed out tobacco and varying degrees of destruction to cultivated fields.

Rainfall from storm was estimated at from an inch and a half at Lancaster to four and a half inches north of Manheim

Lightening struck several residenses and barns, but damage was reported as relatively light. The most costly bolt was one which hit the main power supply to the Lambert-Hudnut plant at Lititz, causing the plant to be shut down all day Monday so that damage could be repaired. More than 400 people are employed at the plant.

Persons interviewed expressed the opinion that this was the most violent storm in the past 15 years. According to two witnesses who live near Manheim, the storm seemed to double back after it had once passed over. over.

In Lancaster, storm clouds were seen in the nortwest together with considerable thunder and lightning at about 6 p. m. But the storm and rain did not strike the city until about 8 p m. There was little damage in Lancaster.

Corn through out the area is bent and leaning. Wheat is down and there is fear that the ripe barley might be threashed out by the wind and rain.

Small creeks went out of their banks in almost flash floods. A party of motorists were caught in the high waters near New Danville, but were aided to safety with no injuries.

There were no reports of injuries to anyone by the storm.

BARLEY HARVEST was nearing completion last week end, until the heavy rains hit the county bringing combining to a stop. Yields are good, with reports of 80 to 85 bushels an acre being reported throughout the Garden Spot. Grain quality is generally good. This 12 foot combine was in operation at the Masonic Homes farm at Elizabethtown. (LF Photo)

## Record Funds Being Offered For Farm Show

An all-time record $61,400 will be offered in premiums at the 1958 Pennsylvania Farm Show, State Agriculture Secretary William L Henning, chairman of the Farm Show Commission, announced Monday

The total exceeds the previous high set for the 1957 Farm Show by more than $2,200, Henning said The amount represents payments proposed by the Farm Show Commission on awards to place winners in the 27 departments of the show, including farm products, special exhibits, contests and the usual demonstrations by school groups.

In addition to approving changes to modernize parts of the premium list, the commission

1 Approved progress reports on the first annual Rural Folk Dance Festival to be staged in the large arena on Tuesday evening of Farm Show Week, and

2. Started wheels moving for a 4-H pony and light horse exhibition as one of the arena attractions in connection with the usual livestock parade on Thursday evening of Farm Show Week.

The folk dance festival, according to present plans, will have county championship teams competing for prizes totaling $750. Local eliminations will be held during the fall months in counties where necessary. The new feature calls for 60 square-dance sets of eight people each, in costume.

The 1958 Farm Show opens January 13 and continues through the afternoon of the 16th, five days and four nights.

## Chester-Delaware Poultry Barbeque Reported Success

The Chester-Delaware County Poultry Assn., barbecue held last Tuesday at New Bolton Center near Kennett Square was a success Harry Adams and L. L. Logan, co-chairmen of the event, were well pleased with the public's support. Approximately 600 persons were served.

In spite of the hot, humid weather the grounds at the Center made an ideal spot for the event. The tables were placed in the shaded area. The chicken was prepared by County Agent, Bob Powers, and assistant Joe Way.

There was much interest in the demonstration barbecue pit; many wished literature and menus for serving friends in their own back yard.

The group enjoyed the visit to Longwood Gardens where the evening was ideal for the beautiful colored fountain display.

Several persons from a distance attended including Mr. and Mrs. Russell Pisor, past president of the Pennsylvania Flying Farmers; and Mr. and Mrs. Willard Myers, Portersville. They flew from Butler, Pa. to Logan field near the Center.

Lock Norton, assistant Regional Director of the National Flying Farmers' Association, Elba, New York; Homer Maxon, president of New York Flying Farmers, and son, Clyde, of Holly, New York; also flew in to Logan field.

## Angus Herd Classification Project In Detail Planning Stage Now

The Angus herd classification program passed another milestone at the board of director's meeting of the American Angus Assn. in St. Joseph, Mo., June 15, when official approval was given to working out the details of the program.

The board is continuing the study of various aspects of the program which would apply to registered Aberdeen-Angus cattle. It was emphasized herd classification would be a voluntary program available to association members. It is contemplated that animals will not be classified until they are at least 15 months of age.

Before the service is offered, the board will adopt an official score card of points to be used by the classifiers as a standard. This score card and the mechanics of handling records will be thoroughly tested before adoption for official use.

A classification committee, made up of prominent breeders and college experts, drew up recommendations for the program recently at Cornell University. The committee includes the following: Prof. J. I. Miller, Cornell University; Dean Emeritus H. H. Kildee, Iowa State College; Prof. R. H. Nelson, Michigan State University; Prof. T. J. Marlowe, Virginia Polytechnic Institute; J. B. Hollinger, Chapman, Ka.; Frank Gwerder, Walnut Grove, Calif.; Albert Seiling, Ontario, Canada; Robert Williams, Rochester, Mich.; Dale Fletcher, Pine Plains, N Y.; John Lathrop, Blanford, Mass.; and Dr. Paul Keesee, Poteau, Okla.

Herd classification, which previously has not been tried on a national basis by a major beef breed, has been used on Angus in New York State. Dairy breeds have classified herds for many years.

It is the feeling of Angus officials that the development of the program will in no way change the type or the superior beef-making qualities of the breed. But this program will assist breeders in obtaining valuable records which can become sound guides to the selection of foundation herds and herd replacements. Such a program should prove useful by giving each breeding animal in a herd a uniform, unbiased rating on type. As a herd develops, these records should provide a graphic check on its progress.

The association directors emphasized that classification of Aberdeen-Angus on a voluntary basis will not be used to disqualify any animal from registration. This forward step is one further service planned by the association to give profitable assistance to the individual breeder.

## PFFA Host To New York Flying Farmers

Pennsylvania Flying Farmers wil be host to New York Flying Farmers for a joint meeting on July 6 at Jacob Miller's, Milton, Pa.

Fly in time is from 9 a. m to 11 a. m. The airport, a private field, is located south of Milton and north of the Milton Commerical Airport. The north-south runway is parallel to the river and highway. The runway is 50 by 1,200 feet.

A picnic lunch, to be provided individually, will be held at noon.

A discussion on final plans for the 1958 convention bid, the regional tour in Mid-October, the 1957 convention at Chicago and a clam bake at the Lock Norton's Elba, N. Y., Aug. 3 will be held during the business meeting beginning at 1.30 p. m.

Boating and swimming are available at Millers.

## Fourth Causes Schedule Change

**The July 4 holiday is causing two changes of schedules in Lancaster County.**

**First of all, Lancaster Farming will reach you a day late next week while the printers take the day off.**

**And the regular Thursday auction of the Lancaster County Poultry Exchange will be held on July 5.**

**Regular schedules will be resumed the next week.**

## Now Is The Time . . .

By M. M. Smith, County Agricultural Agent

### To Cultivate with Caution

The recent extreme weather conditions have been favorable for rapid growth of the corn crop; some early crops have already received their final cultivation. Caution should be exercised to prevent the cutting of corn roots when cultivating. This will stunt the growth and reduce yields. Before the final cultivation you might examine the roots on several stalks to determine how far out into the row they have grown. This will allow you to adjust your cultivator accordingly.

### To Broadcast Domestic Ryegrass

The practice of seeding a winter cover crop in your corn ground is a good one; the roots build organic matter and control erosion. In addition it could be used for fall or spring pasture. Either domestic ryegrass or field bromegrass may be used at the rate of 20 pounds per acre. This should be broadcast over the corn field immediately following the last cultivation. After broadcasting on the loose ground, the next rain will cover the seeds properly. If broadcast before the final cultivation, you will cover many of the seeds too deeply.

### To Observe and Evaluate

The new plant growth stimulator, gibberellic acid, seems to be drawing its share of publicity this summer. Reputed to make plants, trees and shrubs grow extremely fast and large, it might be well to allow the research workers at our state and federal stations do the experimenting. It is not to be used on edible crops and we have no recommendations for its use.

### To Shade Outside Gasoline Tanks

With high temperatures of the hot summer sun on your gasoline storage tank, evaporation losses may be as high as 10 per cent. Tractors may be harder to start on the gasoline that is left and may develop sticky valves. Shade trees, lumber or some type of sunshade will pay dividends if your tank is exposed.

# Broiler Price Steady at 21.5 Cents At Lancaster Exchange Friday

LANCASTER — A total of 104,550 broilers sold for an average price of 21.50 cents at the Lancaster Poultry Exchange Friday. The price range was from 20.50 to 22 50 cents.

This price compares with a 21 33 cent average paid for 72,275 broilers a year ago.

In addition to the broilers, a lot of 400 fowl sold for 19 cents; a lot of 200 males sold for 11½ cents, two lots, 900 Leghorns, sold for 12½ cents, and four lots, 4,300 capettes, sold from 22½ to 25½ cents

Here is the June 21 sale by lot number, seller with grower shown in parenthesis, amount and breed; age in weeks and days, buyer and price.

1. Roy Heckenluber, 400 Arbor Acres White Rock Pullets, 6 mos, Daniel K. Good, 19 cents 1A Roy Heckenluber 200 cockerels 6 mos Daniel K. Good, 11½ cents. 2 John M. Barge, 800 White Vantress cockerel capettes, 12-3, Victor F. Weaver Inc., 25½ cents.

31. Wenger's (Dan Lehman), 2,500 White Vantress, 10, H. W. Longacre Inc., 22 cents. 32. Robert H. Barr, 1,500 White Vantress capettes, 13-2, College Hill Poultry, 22½ cents 33. Robert H. Barr, 750 White Vantress capettes, 13-2, Leola Poultry, 22¾ cents.

# Eggs

PHILADELPHIA — Barely steady. Prices declined on mediums. Demand was fair. All grades were in more than sufficient supply.

Into-storage movement was moderate in volume. Small-lot sales of current receipts brought 25-26 cents when of good quality

Wholesale selling prices: minimum 10 per cent AA quality. Large 45-48 lb. white 37-39, brown 37-38, medium white 28½-29, brown 28½-29. Extras, minimum 60 per cent A quality large 45 50 lb. white 32-33, mixed 32-32½.

Medium white 28 28½, mixed 28-28½, standards 29-30, checks 21-23.

Receipts June 23 3,200 cases all by truck

# Poultry

(BY USDA)

LIVE POULTRY

PHILADELPHIA — Unsettled. Demand good for top quality and light for lesser quality. More than adequate supplies were available. Large light type hens 13-16 cents, small sizes 10-12 cents. White Rock and White Cross pullets 28-30 cents. White Rock and White Cross caponettes 26-28 cents, few lots 29 cents without clearing. Stags 13-14 cents. Caponettes cross fryers 24-25 cents, few lots 26 cents, straight cockerel crosses 23-25 cents, White Rocks 24-26 cents, few early sales 27 cents, Silver crosses 23 cents, Reds 24-25 cents with bulk unsold. Turkeys: weak. Demand light for more than ample supplies Bronze breeder hens 15 cents. Mixed White Holland breeders 16-18 cents without clearing.

Receipts June 25 96,000 lbs included Maryland 22,000 lbs, Delaware 19,000 lbs.

Wholesale selling prices No. 1 and fancy quality broilers or fryers heavy type 3-4 lbs., 23-27. Pullets 4½ lb. and over 28-30. Hens heavy type 17-23, light type 10-16. Old roosters 10-11. Ducks Pekin 25-28.

# Lancaster Markets: Demand Good; Fed Steers Sell at $.50 Higher

By DAVID S. LORENSON

Federal-State Market News Service

LANCASTER—CATTLE; 3,208 week ago, 3,717. Demand was good for the smaller offering of fed steers and heifers this week. Prices were strong to 50 cents higher than last week's close except on standard to low choice; those mostly steady. Cows steady, bulls fully steady. Stockers and feeders slow steady to weak.

Supplies comprised around 35 per cent stockers and feeders and 12 per cent cows.

The slaughter steer offering graded mostly good and choice and average weights largely 1,250 lbs. and lighter. Bulk choice fed steers 1,000-1,300 lbs. $23.25-24.25; high choice and mixed high choice and prime $24 50-25.50, two loads prime 1,200 lb. steers $26 and $26.25. Good and low choice steers $21-22.75, some standard and low good $19-20.50. Small lots good and low choice heifers $19.50-21.50, load 800 lb. average choice heifers $22.75. Bulk cutter, utility and commercial cows $13.25-16.25, canners and low cutters, $11-13. Utility and commercial bulls $18.50-20.50, good fed yearling bulls to $21.50. Bulk medium and good 485-850 lb. stocker and feeder steers and light yearlings $20.50-22.50. Common stock steers down to $18. Load 1,150 lb. partly fattened two-way steers for further feeding at $23.50.

CALVES: 929, week ago 900. Demand poor for veal calves, prices $2.-3. lower than last Wednsday. Late sales veal calves good and choice $20-24, a few head $25, utility and standard $14-19 50.

HOGS 1,563, week ago 1,620. Barrows and gilts about steady

## First Aid for Tired Cattle

When appetites become jaded, it's time to send in new Red Rose Rumenator. It helps cows *off feed* or under stress to get more nutrition from roughage.

A cow's rumen is a constantly working organic machine. Like the crankcase in your tractor, sometimes you have to add some *oil—oil* in the form of added digestive bacteria. The secret? Red Rose Rumenator. It is a fast, efficient way of supplying extra rumen bacteria thru the cows' feed; goes to work quickly turning roughage into usable nourishment, lower cost gain.

In addition to bacteria, Red Rose Rumenator contains growth substances for bacteria, vitamins, minerals and antibiotics.

# Sour Cherry Crop Expected to Be 50 Per Cent Larger than in 1956

HARRISBURG, — Pennsylvania's sour cherry crop is expected to be nearly 50 per cent larger this year than the light 1956 crop, the State Department of Agriculture reported Wednesday.

Estimated production for the Keystone State at 12,500 tons compares with last year's 8,400 tons. The 10-year average is 8,200 tons.

An approximate 35 per cent increase in national production also is reported. Federal-State surveys indicate the national sour cherry crop will be about 130,330 tons. This would be about three per cent greater than the 10-year average.

The early May freeze was variable across the State and hit hardest in the southwest and central portions where few sour cherries are grown. The freeze was restricted to the low spots in the Adam-York-Franklin County fruit belt where growers reported they expect to begin picking about July 4. In Erie County a 35 per cent production increase is estimated over the poor 1956 crop.

# Hackman Named Conservationist

(Continued from page 12)

of about three-fourths of an acre is built. No terrces or waterways were needed because the slope is not steep enough to require it.

The result of this work has causd an increase of wheat yield up to 30 bushels an acre The barley yield this year was 85 bushels an acre and 640 bales of straw were taken fro mthe seven acres

A normal rotation on the farm will go soybeans, wheat or rye or barley, tobacco and grass The pastureland is improved permanent pasture

The modern methods of farming have also meant that modern methods of living are available. A new kitchen was installed two years ago and an addition to the house is now under construction

The Hackmans have also succummed to the new trend of outdoor living On a terrace to the west of the house stands a brand new outdoor grill that shows signs of considerable use.

The Hackmans have no children Living with them they have a young vocational agriculture student, Robert Fornestald He maintains a swine project at the Hackman farm.

# Tomorrow Final Day to File Wheat Reviews

Any farmer not satisfied with his 1958 wheat allotment may file a written application for review in the county ASC office within 15 days from the date the allotment notice was mailed, according to an announcement from the county Agricultural Stablization and Conservation Committee

Tomorrow is the final date this appeal can be filed. Since this is on a Saturday, the appeal should be made in the office today or postmarked not later than midnight tomorrow.

The committee also announced that any farmer who did not grow wheat in the past three years and plans to grow wheat in 1958 may make application for a new farm allotment.

# Thundershowers Bring Moisture To Most of State

HARRISBURG — Thunder showers at week's end revived most of Pennsylvania's crops, the State Department of Agriculture reported Wednesday, following Federal-State surveys for the week ended Monday, June 24.

The northwestern area of the State and the lower Susquehanna Valley benefited from the weekend showers but rainfall was light and spotty elsewhere. Erie reported the most rain for the week, 1 13 inches, while State College had the least, three hundredths of one inch.

Grain crops were reported in good condition over most of the State, although straw was expected to be short on oats Corn had made good progress, barley was being harvested in the northern counties and wheat was ripening rapidly.

# Is Wheat Support Necessary?

The wheat referndum last week was approved just as everyone knew it would be. Farmers in Lancaster County showed their discouragement in being outvoted year after year by almost boycotting the polls.

They knew that the wheat producers in the Great Plains would out vote them by favoring the price supports almost 100 per cent.

And why shouldn't the big producers favor the supports?

Wheat producers have been getting almost two-thirds of all the money spent in price supports. It is the best crop insurance they have ever had.

In a trip through the Great Plains states last year, we saw some of the effects of the current government price support and acreage control programs in the major wheat producing areas.

The farmers have found that there is a lot of wafer under the dry sandy soils of Kansas, Texas and Oklahoma. They also have found that they can, for about $10,000 in equipment, bring that water to the surface and that water will allow them to grow as much wheat on a section that they used to grow on three sections.

So what has been the net result? Wheat production has dropped very little despite all the controls. Corn producers on the fringes of the Plains are finding that grain sorghum is moving in on their market in the feeder cattle areas. And in the Eastern United States, grain importers — those farmers who can not grow enough grain on their own farm—pay prices for wheat that are well over production costs.

Especially are they over the cost of production in the Great Plains in a dry land operation. The ground is plowed once with a disc plow and then planted. The next time the land is gone over is at harvest.

There are no fences, few buildings and no costs for fertilizer. Equipment cost even is low for the size of the operation. The equipment is large and rugged, thus giving a long life per unit and of course giving the economy found in the purchase of a large unit as compared to a small unit.

Compare this to the high land cost in Lancaster County and the tremendous investment per farm in buildings and machinery. Here the diversification of farming demands the machinery budget be chopped into smaller pieces, thus forcing the farmer to buy the most low priced unit available.

Here the land must be prepared and tended carefully to prevent erosion, and fertilizer must be applied liberally to insure a high enough yield to make it worth while to plant a field to wheat.

So lets take a look at what might happen if the price supports were pulled out from under wheat.

First of all, the price would drop to about the world market level which is about $1.35 a bushel. Can a profit be made at this figure? Canadian farmers have been doing it for the last several years with about the same land and equipment costs that prevail in the United States.

The effect here in Lancaster County would be that it would be so unprofitable to raise wheat that the acreage would drop to almost nothing, insofar as grain production is concerned.

But at the same time, demand for wheat as a feed grain would increase thus giving the market a boot upward

Admittedly there would be a period of violent readjustment and seeming chaos while the adjustment is being made, but many economists say that is what is going to have to happen. Even some highly placed officials on Washington have voiced the opinion that a free wheat market is going to have to be developed.

The Congress is becoming more and more aware that the farm population is only about seven per cent of the population of the country as a whole. The Congress is also extremely budget minded this year. So with the agricultural program up for some changes soon, we can expect some revolutionary thinking on the part of Congress. From some of the smoke signals trickling from the District of Columbia, wheat supports just might be one of the changes.

# This Week in Lancaster Farming

BY JACK REICHARD

## 50 YEARS AGO (1907)

A writer on child development in the farm home, a half century ago, put it this way

"There is a time for education and development with boys and girls in the home, just as there is a proper time for the cultivation of the crops in the field. Neglect or postponment in either case entails a loss that is seldom made good."

The writer pointed out it was not reasonable to expect that if youngsters were allowed to act like little heathens in the home they would "conduct themselves like models of etiquette when they were out in company or when there are guests in the home."

* * *

**NEW RULING BRINGS DISTILLERY COMPLAINTS**

Back in 1907 the distillers of the nation were caught short of the "real stuff" following a ruling by Secretary Wilson of the U S. Department of Agriculture, who ordered all whiskey products be labeled according to their contents Secretary Wilson pointed out that if a whiskey was pure, it could be labeled as such, but if it was blended with common alcohol or other adulterants it must bear a label accordingly. The distillers declared the decision, which really was an enforcement of common honesty, would drive them out of business

**OIL DISCOVERED IN LANCASTER COUNTY**

On the Lancaster farm of Clayton Bowman, near the Black Horse Hotel, one mile southeast of Reinholds, kerosene oil had been discovered It was declared that tests were made and the oil found of good quality Promotors were considering forming a stock company to develop the well

* * *

Back in June, 1907, officials of a western municipality decided to do something about hobos who applied to the authorities for assistance. The city fathers enacted an ordinance compelling all applicants to dig up dandelions in the public parks and streets in return for food and lodging The officials reported the new ruling had caused most hobos to sidetrack the city.

* * *

**CIGARETTE LAW ENACTED**

An act making it illegal to sell, give, or cause to be given, cigarettes or cigarette paper to minors had been signed and made law, 50 years ago. Each violation of the law was punishable by a fine from $100 to $300.

One of the many commendable benefactors of Andrew Carnegie, the steel magnet, was the placing of $40,000 at the disposal of Luther Burbank, the American "plant wizard," so that while conducting his many experiments he would not be vexed in making a living

* * *

**MARRIED IN HASTE**

Fifty years ago this week the village of Calvert, Cecil County, Maryland, made news involving a bogus Lord Stanley who won the heart of pretty Miss Irene Clayton, two weeks after they met In order that he would come into possession of a large fortune it was only necessary that he get married, he explained, and accordingly Miss Clayton accompanied him to a parish in Oxford, Pa, where the Rev. J H. Royer performed the ceremony. Later developments proved the man was a fraud, and he was told to take off for more friendly parts.

"Lady" Stanley, too, was completely upset "Come back when you have that $20,000 dowry ready" were her parting words.

## 25 Years Ago

Interesting sidelights on the manners and customs of by-gone-days are found in old newspapers and advertisements. The following public sale announcement was published at Versailles, Ky., in 1849:

"Having sold my farm, and as I am leaving for Oregon Territory by oxen team, I will sell all my personal property except two oxen teams( Ben and Buck, and Lou and Jerry), consisting of the following:

"Two milk cows, one grey mare and colt, one pair of oxen, one yoke, one baby yoke and two ox carts, one iron plow with wood mould board, 800 feet of weatherboards, 1,500 fence rails, 160-gallon soap kettle, 85 sugar troughs, 10 gallons maple syrup, one 40-gallon copper still, two spinning wheels, 30 pounds tallow, one large loom, 300 poles, 100 split hoops, 100 empty barrels, four sides leather, 12 wooden pitchforks, half interest in tan yard, one rifle with bullet moulds and powder horn, soft soap, bacon, hams, lard, molasses, six head of fox hounds, all soft mouthed but one.

"Also six Negro slaves, two men, two boys and two mulatto wenches, all together in one party, as I will not separate them.

"Sale will begin at 8 a.m. Plenty to eat and drink."

* * *

**BANANAS FOR EVERYBODY IN U.S.A.**

"If the bananas imported into the United States in 1931 were evenly distributed, every man, woman and child living in the country would have received several dozen each," stated a bulletin issued by the National Geographic Society in 1932. There were more than 55,000,000 stems of bananas delivered at American ports in 1931, the largest fruit import into the country, according to the report.

* * *

In Delta, Colo., they were manufacturing cheese by the hundredweight. There thieves broke into a cheese factory and made off with 300 pounds of the product.

* * *

While fishing off Fairhaven, Mass., Patrick Healey caught a 12-pound cod inside of which he found a solitaire diamond set in a gold ring.

* * *

Harry Rhutz, of Cedar Rapids, Ia., plowing in a field that morning, turned up a gold watch which his father had lost 20 years before.

* * *

When she refused to go to jail for contempt of court, Mrs. Margaret Fraley of Kingwood, W Va., was picked up in the arms of the sheriff and politely but expediously carried to a cell.

## What Is Greatness

**Lesson for June 30, 1957**

"THE habitual vision of greatness" has been called the secret of the ancient Greeks, one of the world's most wonderful people. Many would say that the ancient Hebrews were even more wonderful; and they too had their "habitual vision of greatness." In our Old Testament are stories of great men, for whom even today little children are named. These great men and women too are of different kinds, you might say only one of a kind Joseph was the kind of great man Americans love to honor He was an immigrant, for one thing, a poor boy, with nothing but the clothes he wore, when he first crossed the border of Egypt. He was a man who rose through all the layers of society, against very great odds. He was the "big executive" type, and immensely rich besides. Now it is not true that such men are always hailed and honored. Sometimes they are no more loved than General Bullmoose. But when such men do give their fellow-citizens a lift of pride, it is because of that something Extra which we call **greatness.**

Dr. Foreman

### The High Soul

Every truly great man or woman has some qualities or gifts which are unique in him, and are partly brought out by his own special circumstances. The greatness of an Abraham Lincoln, for instance, is not that of a Dwight L Moody, and neither of these is quite like Helen Keller. But there are some features to be found in all persons who deserve the word "great" Joseph in Egypt is a good example of these. First of all is what can be called the High Soul. His house of life is open to the sky. He is guided by his faith in God. To such a man, faith is not a thing to be analyzed, or talked about It is something to be lived, and lived by. Every single important step in Joseph's life is connected by his biographer with God; and Joseph himself shows that he was conscious of God's guidance. Even that decisive moment when he was being sold to Midianite slave-traders,—a moment which just then he would hardly have connected with God—, he later saw was an act of God. "It was not you who sent me here, but God," said he to his brothers later. What will God think of this? was not an afterthought with him, but it entered into his decisions beforehand.

### The Open Mind

Great men have their prejudices, no doubt; what human being is entirely free of them? But a great man is capable of living above his prejudices. He can revise his opinions. Neither the man who is forever changing his mind, nor the man who can never change it, is likely to achieve greatness. When Joseph's first son was born, he called him by a name which means "making-to-forget." "God," said he, "has made me forget . . . all my father's house." Joseph at that time, and for years before and after that time, had no communication with his home back in Palestine. To be sure, his family could neither read nor write; but Joseph could easily have sent a message telling them he was alive and doing very well indeed. On the contrary, he seems to have been quite content to be cut off from home. Very likely he thought the less he had to do with his rascally brothers, the better. But when the famine time came, he got acquainted with his brothers again; discovered in one of them, at least, a noble spirit; and he so far revised his attitude that he invited the whole family into Egypt near him.

### The Wide Heart

Joseph's treatment of his brothers showed more than a willingness to reconsider his prejudices. He had a heart willing to forget the past, willing to return good for evil To men who had been as mean to him as they could possibly be, he was as good and generous as he could possibly be. Most of us think we are mighty virtuous if in return for a dirty deal we do just a tiny grudging act of kindness. That is better than vengeance and mean dealing in return; but the great man is far above measuring what he gives by what has been given him. True greatness includes more than justice; it includes forgiveness and mercy. Voltaire used to say about God, "He will forgive—that's his business."

# PCA, NFLB Plan Moving Offices To New Building on Roseville Road

LANCASTER—"Late this year has been set as the target date for completion of a new building to house the offices of the Lancaster Production Credit Assn. and the National Farm Loan Assn," according to Lee R. Brobst, secretary treasurer of the two associations.

The PCA is a farmer owned cooperative short term credit agency and NFLB is a government sponsored cooperative lending agency for long term agricultural credit.

An option on an one and one-tenth acre tract of land on West Roseville Road has been taken from Elmer Esbenshade by the cooperatives The lot is near the proposed site for the now defunct Lancaster County Civic Center.

**The new building,** to be of brick construction, one and a half stories high, will be located nearly mid-way between the Manheim Pike and Route 230 By-pass (Harrisburg Pike)

The approximate diminsions are 36 by 55 feet. There will be a full basement, three private offices and a work area The upper story will be used as storage space.

Brobst said that the plans being drawn up by William Murry & Son allow for future expansion of the basic unit to be used as future needs dictate

The zoning board of Manheim Township is the only remaining major obstacle to construction according to Brobst He said that the zoning board has seemed receptive to the idea of changing zoning regulations to allow construction of the building But, he added, a public hearing required by law, will have to be held before any action can be taken

**The hearing** is scheduled for Monday

The lot, although seemingly surrounded by industry, is presently zoned as a residential area When the Poultry Center was built, the land was annexed by the City of Lancaster and re zoned as light industry

Brobst said that the major reason for construction of the new building is so that more parking space will be available to patrons The officers of the cooperatives are now at 36 East Chestnut St., in Lancaster's congested downtown section

He added that the building's owner also has other plans for it

G G Minnich, R3 Lititz, is president of the PCA and B G Bushong, R1 Columbia, is president of the NFLB

# Care Is Urged In Cleaning Spring Equipment

Extreme care in the method and place to clean equipment used in spraying fields and orchards is urged by the Pennsylvania Department of Health

Recent complaints of stream pollution were traced to the practice of washing the equipment near a stream and dumping the residue into the stream or water shed, stated Robert Eppley, sanitary engineer, Regional Office, Reading, Pennsylvania.

It is pointed out by the Clean Streams Law and those responsible for the pollution and any damage that may be caused to fish or aquatic life can be penalized.

A shallow ditch should be dug and the waste water buried The ditch should not be near any stream or water shed and not deep so as to affect underground water sources.

## 'Precooked' Fudge Mix Assures Perfect Candy with Little Work

Have you discovered wonderful quick fudge mix for making candies? If not, you've a treat in store Regular users know how easy quick fudge mix is to use — all the work is taken out of fudge making. Quick fudge mix is precooked for you by the manufacturer So, you make a perfect batch of smooth, creamy fudge — without testing or beating Just heat with butter and water for four minutes

Try one of the three flavors of quick fudge mix today — popular chocolate, rich brown sugar penuche, or lucious coconut Follow the suggestions on the package for making many delightful candy variations. You'll be an expert fudge maker the first time you use quick fudge mix.

Don't limit your candy making to plain fudge. Try your hand at other variations — add fruits, nuts, coconut and other ingredients to fudge — make attractive bon bons from any of the three flavors of quick fudge mix—shape into luscious nut and fruit filled rolls — use fudge for filling dates — make nut, raisin or coconut clusters

Candy making is fun — start now and in no time you'll have the skill of a professional candy maker Not only will your family enjoy these luscious candies — it will bring premium prices at fall bazaars and candy sales, and will be perfect for holiday gift boxes.

Here are directions for making the elegant fudge variations shown

**FRUIT AND NUT VARIATIONS**

Use chocolate, coconut or penuche quick fudge mix Make fudge as directed on the package. Before pouring, add one of the following ingredients, depending on the flavor.

To chocolate fudge add:
¾ cup chopped black walnuts
½ cup chopped dates and ½ cup nutmeats
½ cup raisins

To penuche fudge add:
¼ cup raisins and ¼ cup nutmeats
¼ cup chopped dates and ¼ cup chopped figs
¾ cup chopped almonds

To coconut fudge add.
¼ cup chopped candied fruit mix
3 tablespoons chopped candied

(Continued on page 7)

USING BASIC CHOCOLATE, penuche or coconut quick fudge mix, you can vary the candy you make by rolling it into balls for fudge bon bons. The balls are then rolled in coconut, cry cocoa, chopped nuts, sprinkles or colored sugar to add the particular color or taste that your family likes best.

How many tomatoes can a vine hold?

...use DITHANE M-22

After using DITHANE M-22 (maneb) for disease control, a lot of growers remark how the vines look so crowded with big, choice tomatoes. No one has yet counted the exact number per acre, but experiment stations have measured up to 15% higher yield with DITHANE M-22 than with other types of fungicides. DITHANE M-22 results in maximum yields because it gives maximum protection from anthracnose, early blight and late blight, gray leaf spot and Septoria leaf spot. With this manganese-containing fungicide, vines also develop a greener and more luxuriant foliage. Use DITHANE M-22 and see.

cherries

½ cup chopped toasted almonds

**FUDGE BON BONS**

Use chocolate, penuche or coconut quick fudge mix. Make fudge as directed on the package, omitting nuts. When fudge is cool, cut in one inch squares and roll into balls.

Decorate by rolling balls in one of the following — shredded or toasted coconut, cholocate shot, multicolored sprinkles, or colored sugar Cherry, walnut, or pecan halves, or toasted almonds may be pressed into fudge balls for decoration.

**HAWAIIAN FUDGE ROLL**

Make coconut fudge using three and one-half tablespoons pineapple juice in place of water Just before pouring, stir in one-half cup chopped walnuts and two tablespoons chopped candied cherries. When cool, shape into a roll one to two inches in diameter and 10 to 12 inches long Wrap in wax paper and chill one-half hour. Cut in slices.

**ALMOND CHERRY ROLL**

Make chocolate fudge following directions on quick fudge mix package. Stir in ¾ cup chopped almonds and two tablespoons chopped candied cherries When cool, shape into a roll one to two inches in diameter and 10 to 12 inches long. Chill one-half hour before slicing

**WALNUT FUDGE ROLLS**

Make penuche fudge as directed on package. Before pouring stir in three-fourth cup chopped walnuts. When cool, shape into two rolls, about one inch in diameter and 12 inches long.

Make chocolate fudge as directed on package, except omit nuts Pour fudge in thin layer (12x6x one-fourth inch) on wax paper. Cool slightly. Place one penuche roll on chocolate fudge. Roll like jelly roll until chocolate completely covers penuche roll. Press ends of fudge together to seal Roll in chopped walnuts Roll in wax paper and chill one-hour before slicing.

Cover remaining penuche roll with shredded coconut. Wrap in wax paper and chill one-half hour before slicing.

PINEAPPLE JUICE ADDS a distinctive taste to fudge when substituted in a quick mix in the place of water. The addition of walnuts and cherries makes a fruit fudge roll the whole family will enjoy. Other variations in making rolls are to make almond - cherry rolls or walnut fudge rolls.

Now that we've shown you how easy it is to make some delicious candy, we'll give you a recipe for some cookies, Jubilee Jumbles. Mrs Levi Stauffer says in her letter

I had put this letter on the shelf and I forgot it so when I came to read up the shelf I noticed I had not written you yet. We do like your paper very much Will send you a cookie recipe which we like very much. Everybody that tastes them says they are good. They stay soft.

(Continued on page 8)

HEALTHY BABCOCK BESSIE says:

Reasons Why Laying Pullets Pick

No 2 Laying pullets are in a constant state of pregnancy and since they are developing eggs daily they have cravings for various types of foods and also have quite a craving for salt Your feed has to have just exactly the right amount of salt in it, not too much and not too little Overfeeding on scratch grain will reduce the amount of salt Your pullets get to the point where they will pick one another to satisfy this urge Also feeding too high a proportion of scratch grain cuts down the protein and other vitamins they crave which frequently will get them to picking feathers and even flesh on other pullets

Therefore, we suggest that you not feed layers more than 10 lbs of scratch grain per hundred birds per day for White Leghorns and at the very most do not feed over 12 lbs per hundred birds per day in the cold weather to heavily laying birds Reduce scratch grain in warm weather

Feed a top quality laying ration that is finely ground so that the birds cannot sort out coarse particles in the mash Provides plenty of space for birds to eat and at least 3 sq ft of floor space per bird Pullets that are overcrowed in the laying house get awfully sick of looking at one another and may start picking just on general principles Scratch grain should be fed in the litter in all parts of the pen to provide exercise and give every bird an even chance at the feed This allows each pullet to get enough and none to get too much

Babcock Bessies are not naturally cannabilistic They will lay at a high rate of speed for a long time and will come up in egg size rapidly You will like these Bessies For literature and prices write

### JUBILEE JUMBLES
**Mrs. Levi W. Stauffer**

½ cup soft shortening
1 cup brown sugar (packed)
½ cup granulated sugar
2 eggs
1 cup undiluted evaporated milk
1 teaspoon vanilla
½ teaspoon soda
1 teaspoon salt
1 cup walnut meats or raisins or coconut
2¾ cups flour (I mix all-purpose flour with a small amount of cornstarch)

A few suggestions for rhubarb are sent in by a reader who does not want her name used. She says in her letter

In reading over the rhubarb recipes I did not find any of the ways I cook it which is a favorite of my family.

I always remove the skin from the rhubarb. Then before cooking it I cut it in small (about one-half inch thick) I cover it with boiling water and let stand for about 15 minutes Then drain and add a small amount of water to cook When rhubarb is cooked remove from heat and add the necessary amount of sugar, also three or four oranges cut in small pieces or one lemon sliced thin

Do not cook with oranges in it as it is not good that way

Rhubarb is very easily canned by simply preparing as for cooking (but do not scald) and filling glass jars with the raw rhubarb Fill jars with cold water, running jars over to get out all the air bubbles Seal with the one-piece zinc lids as you do any other canning Of course, this has to be cooked before using Simply pour off about one-third of the water and cook as usual This tastes quite good in winter when fresh rhubarb is out of season.

It will soon be time to can pickles and make tomato and pepper relishes We have a few recipes you may want to try this season If you have a favorite pickle or relish recipe that your family is especially fond of, we hope you'll send it in to us as soon as possible so that we can print it in time for our readers to use this summer.

Our first recipe is for Lime-water Pickles. Mrs. Victor L. Gish has sent it in to us, and she says

I'm sending a pickle recipe which is very good. So many of my friends have requested it and I thought the readers of **Lancaster Farming** might enjoy making some of these crisp pickles.

### LIME - WATER PICKLES
**Mrs. Victor L. Gish, R3 Manheim**

7 pounds pickles — sliced about one-fourth inch thick
1 gallon cold water
1 cup lime

Put lime in water, put pickles in for 24 hours. Rinse and let stand in clear water for three hours.

Boil together the following:
1½ quarts vinegar
1 quart water
9 cups sugar
1 teaspoon celery seed
1 tablespoon pickle spice
1 tablespon salt

Boil and pour over pickles. Let syrup to a boil. Put pickles in syrup, simmer 30 minutes and can Very nice and crisp.

### BREAD AND BUTTER PICKLES
**Mrs. Rufus B. Waltz, R3 Manheim**

8 cups sliced pickles
2 cups sliced onions (salt onion, let stand 1 hour)
2 cups vinegar
3 cups sugar
2 teaspoons celery seed
1 or 2 teaspoons tumeric
4 green peppers
Few sticks cinnamon

Boil together 20 minutes and seal.

### PEPPER RELISH
**Mrs. Elmer V. Good, R1 Lititz**

12 green peppers
12 red peppers
12 medium size onions

Grind all, cover with boiling water for 15 minutes Drain. Add one quart cider vinegar, two cups sugar and three tablespoons salt Boil 40 minutes Put in jars and seal.

### Jolly Stichers 4-H Club Makes Picnic Plans

The Farmersville 4-H sewing club, the Jolly Stichers, met Monday at the Hans Graf School.

Plans were made for the girls to go on a picnic.

## Kosher Pickle Recipe Wanted

"Can some one tell me how to make the real Kosher pickles?" askes Phares G. Keller, R2 Lititz.

If you can help by submitting a recipe, address it to Women's Page, Lancaster Farming, Quarryville, Pa.

With the canning season here, if you have any especially good recipes for canning, pickling or preserving, send them along.

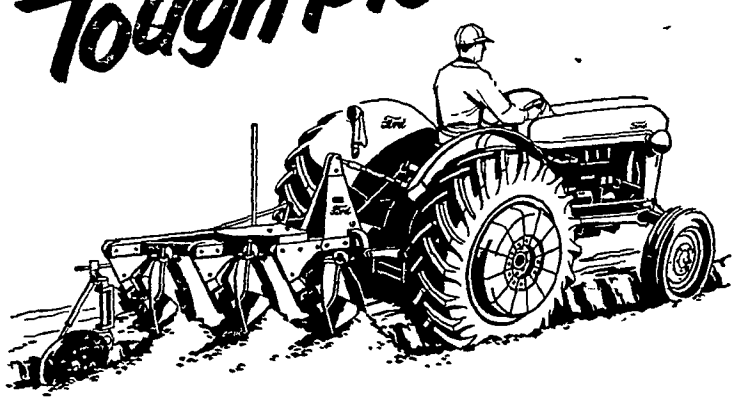
TOPS FOR Tough Plowing!



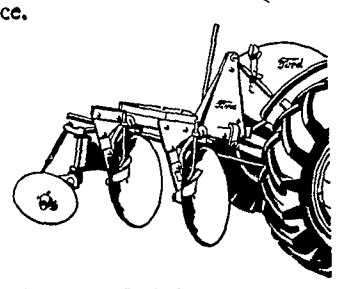
FORD DISC PLOWS
2 AND 3-DISC SIZES

You can't beat 'em for easy, effective performance in your hard-to-scour, hard-to-penetrate, sticky or abrasive soils!

Built-in adjustments for vertical disc angle, width of cut, and position of the floating, steerable furrow wheel help you to effectively meet a wide variety of plowing conditions Truss frame construction provides strength as well as extra good trash clearance.

CLOSE COUPLED AND FULLY MOUNTED

Ford Disc Plows are simple to control and convenient to maneuver for efficient performance, easy transport and storage.



LET US SHOW YOU HOW THESE OUTSTANDING ADVANTAGES CAN MEAN BETTER PLOWING FOR YOU

UNIVERSITY PARK.—Mrs. Robert Nolt, second from left, R1, Lancaster, was one of six homemakers on the steering committee for Extension Homemakers Week, June 17 to 20, on the Penn State campus. This fifth annual event attracted 475 women, and all but eight of the 67 counties were represented. Mrs. Nolt was toastmaster at the banquet in the Hetzel Union Building at which Mrs. Dexter O. Arnold, Concord, New Hampshire, was the speaker. Other homemakers on the steering committee were: from left, Mrs. Harold Streator, Corsica, Clarion County; Mrs. Nolt; Mrs. Edward Turnbull, Clarks Summit, Lackawanna County; Mrs. Robert Crissey, Central City, Somerset County; Mrs. Richard Meade, Havertown, Delaware County; and Mrs. Pauline Fetter, Herndon, Northumberland County.

Mrs. Nolt was one of 24 Lancaster county homemakers who attended this state-wide meeting. (Penn State Photo.)

# R. J. Riddell Elected President Of Meat Board at Annual Meeting

At the business session June 14, which concluded the two-day annual meeting of the National Live Stock and Meat Board, R. J. Riddell, Peoria, Ill, was elected chairman of that organization's 30-member directorate. Riddell is a representative of the National Livestock Exchange on the Board. He succeeds John F. Krey, St. Louis, of the American Meat Institute, who became vice-chairman.

A record attendance of more than 800 people from all branches of the livestock and meat industry were in Chicago for the meeting. They came from 35 states to hear reports and see demonstrations on the Board's nation-wide program of meat research, education, and information.

Mark Knoop, Troy, Ohio, a representative of the American National Cattlemen's Assn., was named to the position of treasurer. Carl F. Neumann, Chicago, was re-elected secretary-general manager

Taking note of the current legislation involving the raising of funds for meat promotion, a resolution was passed reaffirming the Board's position of neutrality on such legislation

The board of directors is made up of representatives of national and regional cattle, swine and sheep associations, farm organizations, marketing agencies, meat packers, meat retailers and restauranteurs. The National Live Stock and Meat Board is the service organization of the nation's livestock and meat industry.

Guest speakers at the meeting included Dr Philip White, Secretary of the Council on Foods and Nutrition, American Medical Association; Dr. Vilhjalmur Stefansson, Arctic explorer and anthropologist; and Wesley Hardenbergh, president of the American Meat Institute.

*when watery spring pastures make fussy eaters . . .*

## Purina Bulky-Las whets appetites, helps maintain top cow condition

Dairymen don't ordinarily complain this time of year about milk flow *or* cow condition.

But, when lush pasture grass contains up to 85% water, cows often eat so much grass they get full and won't eat their grain. They continue to milk well, but often lose weight if they do not eat enough grain while on lush pasture.

Then, when pastures turn brown, most of the grain ration will be needed to maintain the cows' bodies. Milk production usually drops off when body condition is poor.

**Maintain body condition with Bulky-Las**

Top-feed palatable Bulky-La with whatever ration you are nov feeding . . . (up to one-half gallo per cow per milking). Bulky-La stimulates cows' appetites, add body-building nourishment t your ration, and keeps cows producing well, right up to dry-off time. Cows go for the molasses, bulky beet pulp, alfalfa meal, vitamins and minerals in Bulky-Las.

Bulky-Las helps balance with minerals and energy the watery grass your cows eat on pasture.

No matter what kind of grain ration you are now feeding, ask us about Bulky-Las. We will gladly give you *proof* that Bulky-Las is tops when it comes to helping maintain *cow condition.*

**Kill those flies now!** Get the jump on the fly problem this spring. Sprinkle PURINA FLY BAIT lightly wherever flies gather. In the dairy barn, poultry house, kennel . . . and in outdoor areas, too. Flies naturally *go* for Purina Fly Bait. And does it kill 'em! So, be sure to check your Checkerboard Man, and beat the fly problem.

- TURKEY IS THE NEW HOME OF THIS Maryland bred Hereford. The animal is shown being unloaded from the plane by a group of Turkey's agricultural leaders. The young whiteface was secured from H. C. Jefferson of Skyesville, Md., and donated to the Ataturk Farm near Ankara by Heifer Project, Inc. The imported cattle will be used to improve the native cattle of Turkey, according to F. A. Ralston, livestock advisor with the International Cooperation Administration in Ankara.

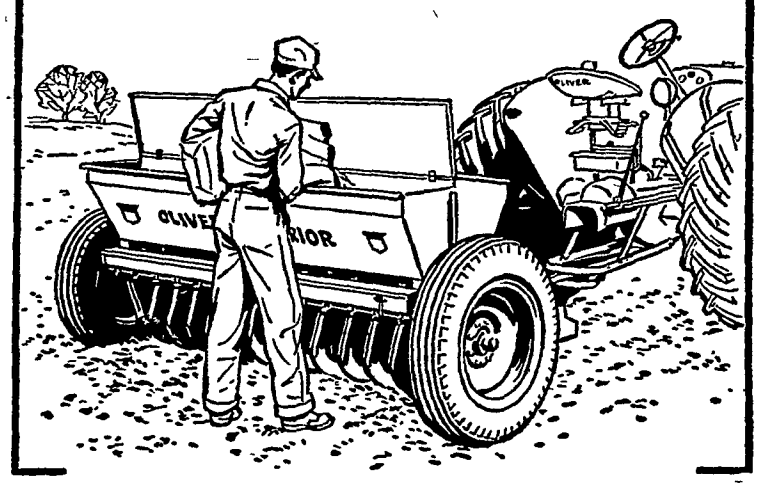
**OLIVER**

**SUPERIOR DRILL**

**Double Capacity...**

**Low Hopper...Life-Seal Bearings**



This new No. 64 Drill doubles capacity—holds a bushel of grain and 80 pounds of fertilizer per foot. The extremely low hopper—only 3½ feet off the ground—is easier to fill. And, you have this same low height whether you choose 20-inch or 15-inch wheels, both taking low-cost, used tires.

Lifetime-seal disc bearings eliminate daily greasings, save time and cost of lubricant. A low, rear-mounted grass seeder sows in bands, or broadcasts. You have a choice of 144 grain seeding rates, 30 fertilizer distribution rates ranging from 65 to 645 pounds per acre. The famous Double-Run Force Feed handles any size seed, meters accurately, avoids waste. Plain grain drill, holding 1⅞ bushels per foot, available.

# Farm Journalists Invited Here By New Holland

Farm journalists from throughout the Northeastern United States will be in Lancaster Tuesday to witness a "press preview" of the New Holland Machine Co's "hay in a day" system.

The writers will see in operation mowers, crushers, balers, both conventional and self propelled, and wagon driers.

The demonstration, to be held at New Holland's experimental field at Lancaster Municipal Airport, will not be open to the public.

According to the public relations department, this is the first of a series of such demonstrations to be held for farm writers throughout the nation.

# Judges Named For Holstein Regional Shows

The Holstein-Friesian Assn., of America has announced a judging schedule for its 1957 regional and national Holstein shows.

The Western regional will be held Sept 16, in connection with the Utah State Fair at Salt Lake City, Eugene W Nelson, Union Grove, Wisc, Holstein breeder, will judge the event.

On Sept 18 and 19, Dean Gordon M. Cairns of the University of Maryland will officiate at a similar show at the Eastern States Exposition, West Springfield, Mass

The Southern regional show is scheduled for Sept. 26 as a part of the Mid-South Fair, Memphis, Tenn Merle Howard, manager of the famous Mooseheart Holstein herd, Mooseheart, Ill will judge.

J. A. Fairchild, an official inspector in the Herd Classification Program of The Holstein-Friesian Assn of America, will judge the Southwestern show It will be held Oct 8, in connection with the Pan-American Livestock Exposition of the State Fair of Texas at Dallas.

Professor George Trimburger of Cornell University has been selected to judge Holsteins at the Internationl Dairy Show, October 10 and 11 at Chicago

The National Holstein Show will again be held in conjunction with the National Dairy Cattle Congress, Waterloo, Iowa. Holsteins will be judged Oct 3 and 4 by William K. Hepburn, Dalton, Pa

## Horn Flies Voted Most Unpopular

Information based on reports from 33 states show which insects were most unpopulare pests of man and beast in 1956

Horn flies were rated as the No 1 pest of farm animals in 16 states, cattle grubs and lice named in 14, and stable flies in 12. Biting flies were also high on the list of livestock pests.

Mosquitoes and house flies were rated the most unpopular among household insects in 1956.

# Intercourse Invites USAF Plane Crew as Special Jubilee Guests

The village of Intercourse has sent a special invitation to three Air Force men to be their special guests at the Intercourse Summer Jubilee to be held on Aug. 16, 17 and 18.

These men were the crew of the huge two-engine C-46 Air Force plane which, due to bad weather and lack of fuel, were forced to land in a soft cornfield beside the village last Oct. 26. The guests are 1st Lt. Thomas A. Clark, Neptune, N. J., 1st Lt. Walter E. Bachman, Jr., Doylestown, Pa.; and Henry LaRoche, A/2C, New Castle, Dela. All three are reserves in the U.S. Air Force.

# Activities Planned For Next Month By Society 3

LITITZ—A full month of activities was planned by Farm Women 3 at a meeting held June 15 at the home of Mrs. Robert Hollinger in Lititz.

On June 30 some of the members will conduct a Ward Party at the Coatesville Veterans Hospital. During July the Society is scheduled, together with Society 4, to serve at the Lancaster County Home.

And a family picnic is scheduled for July 21 at the Brickerville Church Grove.

During the business meeting, $20 was given to the County Council to be used in the county project.

Mysterious sisters were revealed and new ones were selected

During the program, members showed hobbies or told about their hobby. Miss Linda Stuber danced a ballet number and Miss Beverly Keener gave an organ recital.

Devotions were led by Mrs Hollinger.

# Farm Women 12 Hear Address On Health Unit

MILLERSVILLE — A talk by Mrs. Lewis on the County Health Unit was heard by Farm Women Society 12 at their June meeting at the home of Mrs. Edith and Mrs. Paul Harnish, R1, Conestoga.

During the business session, it was decided to give donations to the Migrant Workers' Fund, the U S O. and the County Executive Board for use in the Farm Women's County Project

Part of the program featured an exhibit of flower arrangements. Mrs. Edna Hailing was named for her miniature arrangement and Mrs. Elsie Shank was named for having an outstanding large display.

Mrs. Frances Elsen was in charge of devotions. Twenty members answered roll call.

The Society will hold no meeting in July. The August meeting will be a picnic Aug 13 at Safe Harbor Park.

# County 4-H Track Team Selected

George Rohrer, R7 Lancaster, will represent the County in two events at the track meet at 4-H Club week, Aug. 12-15.

In tryouts held Wednesday morning, he came in first in both the 100 yard dash and in the 220 yard dash.

The winner of the 440 yard run was Melvin Graybill, R2 Lititz, and the 880 yard run won by Edward Graybill, R2 Lititz.

A PLENTIFUL SUPPLY of water for the dairy cow herd is no problem for Hackman. The pond has a surface of about three-fourths of an acre The pond is fenced and a water trough with continuous flow is located below the dam. Hackman said that he had not been swimming for many years until the pond was built. (LF Photo)

A DAY THAT IS TOO wet for field work is ideal for cutting pasture and roadsides. Here Hackman and Flash, an eight year old Collie, prepare to take care of some of these odd jobs Monday. Hackman has been chosen as Conservation Farmer of the Year by the Lancaster County Soil Conservation District. (LF Photo)

# A. H. Hackman Conservation Farmer of Year

Outstanding Conservation Farmer in Lancaster County this year is Andrew H. Hackman, R2 Manheim He was named to this honor by the board of directors of the Lancaster County Soil Conservation District

Hackman was visited by Lancaster Farming Monday afternoon. On the way to his farm, one of the most outstanding features in the fields of many farms were deep, raw, ragged new gullies cut by the heavy rainstorm the preceeding night.

But at the Hackman farm there were none of these signs of poor soil stewardship. He said that the rain Sunday was the most in the shortest time since he had moved to the farm in 1940.

But the only washes found on the entire farm were in a strip of tobacco on a rather steep hill side. And even this displaced soil was caught by the strip of hay sod below it. There were no washouts from the sodded ground.

Believing that conservation farming and grassland farming go hand in hand, he has given up the practice of growing corn and says that he soon intends to give up tobacco.

The early spring grass goes into two silos.

"My cows are on full winter feed right now," Hackman said. "The grass in the pasture dried up during the hot weather, so I put them on full winter feed."

The early silage is a rye and alfalfa-grass mixture. This is expected to be fed out in time to fill both silos with a sorghum-soybean mixture.

Hackman carries a milking herd of 20 to 21 Holsteins and Ayrshires on the 68 acre farm. The pasture land makes up the bulk of the crops — 18 acres. This year there are seven acres of barley, about three and a half acres of wheat, 10 acres of soybeans and sorghum, eight acres of grass for silage, five and a half acres of tobacco and the remaining 16 acres are in grass for hay or silage

Strip cropping was put into practice when Hackman first bought the farm 'This place was really in bad shape when I got it," he said "The first year the wheat made only about 10 bushels to the acre"

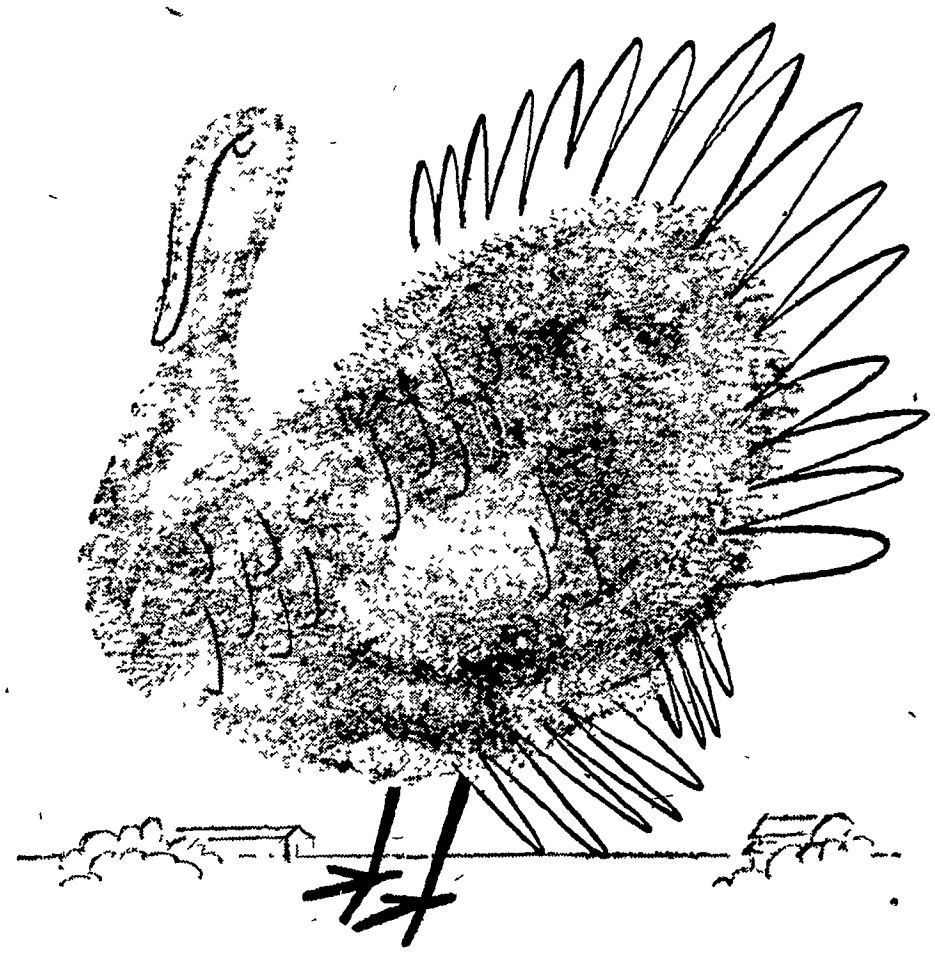
"But we have really poured the manure, including the liquid manure, on it"

The farm is now in the process of being changed to contour strips A new pond with a surface

(Continued on page 3)

Put premium flavor under those feathers with

BEACON TURKEY FEEDS



It took a threefold increase in turkey production in the last 20 years to satisfy American appetites.

As this huge mountain of meat continues to grow, it is sure the market will seek out—at premium prices—carcasses of better quality and finish. Here's where the highly efficient Beacon-trolled Feeding and Management Program can help you.

It builds moist, tender meat — deep meat — with the flavor that brings buyers back for more. And it builds it economically.

This year, feed for premium finish! Start right with Beacon Turkey Starter and follow through with the Beacon Turkey Growing program best suited to your flock. See your Beacon Dealer now.

LIVING PROOF

Since 1927 when Beacon made the industry's first complete line of commercial turkey feeds, thousands of poults like this one have been raised at Beacon Poultry Research Farm, Cayuga, N Y Constant research keeps the Beacon-trolled Feeding and Management Program efficient and practical for turkey growers.
